

CHINA NATIONAL BUILDING MATERIALS GROUP CORPORATION

Social Responsibility Report

Preparation Notes

This Report gives a true picture of China National Building Materials Group Corporation's (CNBM) performance of social responsibilities.

Period Covered by the Report

1 January to 31 December 2015; given the progressing continuity of certain businesses or projects, some contents relate to the first and second quarters of 2016, the details of which are indicated in the Report.

Reporting Frequency

Annual report.

Entities Covered by the Report

All the wholly-owned or controlled (including absolute and relative controlled) members of CNBM. For the purpose of concise description, terms of "CNBM", the "Group" and "We" are used in the Report to refer to China National Building Materials Group Corporation.

Data Sources

All information and data used herein are from the headquarters of CNBM and its member companies. Notes have been made in the report for the information from external reference. Unless otherwise

Which report is this one? How to get these reports?

This is the seventh social responsibility report released by CNBM. Please ask for the printed version of each year's Report via the contact information on the cover. You can also scan the twodimension code below or log onto http://www.cnbm.com.cn/EN/ to download the electronic versions and get more related information.

How to guarantee the data released in the Report?

The financial data in the Report are derived from CNBM 2015 Annual Financial Statement which has been audited by Baker Tilly China.

External data in the Report are derived from those released by third parties through media, sources of which are indicated in the Report.

The non-financial data in the Report are derived from CNBM's CSR information management system. Data in the system are faithfully reported by functional departments and offices of ${\sf CNBM}\ head quarters\ and\ its\ member\ companies\ in\ accordance\ with\ {\sf CNBM}\ Social\ Responsibilities$ Management Information Collection Measures; data of member companies are submitted to the headquarters after approved at all levels; each department or office of the headquarters reviews special data according to its function; to ensure the standardization, reliability and authenticity of the data, the headquarters verify data of member companies through sampling at a proportion of at least 5%.

How is this report prepared?

This report is prepared according to China CSR Reporting Guidelines (CASS-CSR3.0) issued by the Chinese Academy of Social Sciences, CNBM Methods of Social Responsibility Management, and CNBM Social Responsibilities Management Information Collection Measures. The detailed preparation process is as follows:

Preparation Process of

1.Project startup

Defining annual work plan, convening meetings or issuing documents

2.Defining core topics and boundaries

Analyzing of stakeholders' concerns, defining annual major core topics, analyzing domestic and overseas CSR standards and guidelines, studying new standards and trends

3. Printing and distributing information list

Defining indicator system of information system, making list of annual star cases

4.Collecting materials

Feedback on member companies' materials, feedback on functional departments and offices' materials, analysis of stock materials, collection of media reports

5.Writing report

Drawing framework of the Report, defining the topic, compiling the first

6.Consultation

CSR leading group, functional departments and offices in the headquarters, member companies, stakeholders, CSR experts

7.Improvement

Text revision, data verification, standard self-examination

8.Design

Readability, innovation, continuity

9.Evaluation

Rating Standards of Corporate Social Responsibility Reporting in China (2014)

10.lssuance

Transmission to stakeholders via multiple carriers and channels

11.Summary & Promotion

Analyzing deficiencies and making improvement planhttp://www.cnbm.com.cn/EN/c_IIII016II04II01/

On what standards is the Report based? How about the benchmarking and the evaluation?

The preparation of the Report is based on Sustainable Development Report (G4) published by the Global Reporting Initiatives (GRI), Social Responsibility Guide (ISO26000) issued by the International Organization for Standardization (ISO), CSR Reporting Guidelines GB/T36001-2015, China CSR Reporting Guidelines (CASS-CSR3.0) issued by the Chinese Academy of Social Sciences, etc. Please refer to Page 62-65 of the Report for the benchmarking between the Report and CASS-CSR3.0 and the evaluation result.

How to feed back opinions and contact us?

You can complete the feedback page in the end of the Report, and send it to us through fax or mail; you can also visit the official website of our company or scan the two-dimension code below, and fill in your opinions on the web page or WeChat; you can also contact us directly through the contact information on the back cover.

China National Building Materials Group Corporation 2015 Social Responsibility Report

Chairman's Address

Standing on the moral high ground to do business

The "Twelfth Five-year Plan" period is a golden stage for CNBM's growth and development, as well as a key period for us to make steady headway in social responsibility management and systematically carry out responsibility practices. Starting from releasing the first social responsibility report, we built social responsibility organization system, established and perfected social responsibility management rules, deepened the concept of responsibility and established responsibility model; we conducted stakeholder management and regular release of social responsibility report; we built the framework of five major responsibilities, continued

responsibility-fulfilling practices and persisted in improving responsibility-performing ability and level; we carried out responsibility research, joint in responsibility initiating organization and action plans to promote the dissemination and sharing of responsibility. We achieved growth from scratch and became the practitioner, impeller and leader of social responsibility.

General Secretary Xi Jinping said: "Only wealth with care is of true meaning; only the enterprises actively undertaking social responsibilities are the most competitive with the most vitality." Over the years, CNBM has been exploring in practice the most effective ways of sustainable development, as well as its laws and logic. Business activities regard profits as the core, but the companies are not pure economic organizations whose fundamental purpose is to serve the community. As the saying goes, a small victory is won by wisdom, a big by virtue. The development of enterprises should be combined with wellbeing of human, fate of the country, interests of the industry and happiness of employees. We should stand on the moral high ground to

Being people-oriented and pursuing the realization of human values and happiness.

CNBM has always regarded "people" as the company's most valuable asset, and adhered to the principle of "enterprises being people, by the people, for the people and loving the people." Running enterprises relies on efforts and dedications of cadres and staffs; the development of enterprises is, in the final

analysis, for the people, including business people, investors and social persons. We have always been people-centered, focusing on the life security and occupational health of employees, respecting employee's rights and interests and caring staff's well-being and growth. We will build the corporate into a stage for employees to show their talents, as well as a home giving them sense of security, warmth and happiness. We devote creativity and labor contributions of staff to social developments and regard human happiness and value as a significant goal and the fundamental pursuit of the Group.

Putting the interests of the whole industry above everything and taking the course of mutual benefits and win-win situation. We always adhere to the idea of "industry interests outweigh those of enterprises which lie in the former" and strive to prop up the umbrella aiming at coexistence and multi-win situation for the industry. We take the lead in eliminating the backward, merger and reorganization and industry consolidation, leading the industry from competition to cooperation-competition and from the jungle to the blue ocean. We unite industry strengths with inclusive heart, making cement-industry concentration degree increase from 15% in 2005 to the present 58%. We have continuously expanded scientific and technological resources of the industry, built industry's innovation flagship and contributed efforts to industry sustainable development. A number of major scientific and technological achievements have been successfully applied to major engineering and construction projects such as Beijing Olympics,

high-speed railways, the Three Gorges, and Beidou Satellite. We promote adjustment and upgrading of industrial structure while realizing leapfrog self-development.

Human well-being first and following the logic of green and sustainable

development. Building materials industry has all the time been highly dependent on resources and energy. We pay more attention to the sustainability of resources and energy, climate and ecological and environmental problems. We have implemented efficient manufacturing, clean production and comprehensive utilization of industrial and urban waste resources in many ways, achieving nearly 100 million tons of absorptive capacity of solid waste and taking lead in green manufacturing of building materials. In 2015, we launched "Blue Sky Responsibility" action plan, and made guarding the blue sky the first corporate responsibility, and proposed implementation plan for building materials industry group to tackle climate change. We are committed to providing for the community green and environmentfriendly building materials, promoting new building materials and Energy Plus 5.0 green town. We manufacture fan blades and strive to develop thin-film solar cell industry. Solar energy conversion efficiency of thin-film solar cell module has exceeded 17.9%, making contributions to the development of new energy.

Taking common development as the guiding principle and practicing responsible operation model of "the Belt

and Road Initiative". CNBM is an advocate and practitioner of common development concept. In the meantime of giving play to our own industrial advantages, we promote common development within our area and related industries. During the "Twelfth Fiveyear Plan" period, a total of 42.18 billion yuan was turned over to local taxes, a total of more than 90,000 new employment opportunities were created and our charitable donations reached 88.31 million yuan. In the practice of "the Belt and Road Initiative", we uphold three concepts: first, to contribute to local economic development; second, to work closely with local businesses; third, to live on friendly terms with local people. With common development concept as the core, we actively promote policies of localization of raw materials, staff, environmental protection and public welfare, adhere to responsible development and utilization of resources in the area when giving play to our own industrial advantages, provide goods and services, jobs, tax contributions, public support for the region and protect the local environment and market order, and strive to become a practitioner, advocate and promoter of harmonious development.

Chinese economy has entered a new normal, with lack of market demand and severe overcapacity, and is facing enormous pressure and challenges. Looking into the "Thirteenth Five-year Plan" period, CNBM people, with full confidence, have worked out a blueprint for transformation in the new stage. In the next five years, we will focus on five development philosophies, stick to "three major development strategies" of innovation-driving,

green development and internationalization; as for transformation and upgrading, we will work well to achieve the transformation and upgrading of traditional industries; we will vigorously develop the "three new" industries, strengthen "three curves" of manufacturing servitization and R & D industrialization, promote "four changes" in business model, value orientation, business areas and market area to achieve humanization, wisdom, greenorientation, performance-base and "five visions" of global enterprise groups.

As Confucius said, "the benevolent love others", "the benevolent take delight in benevolence; the wise practice benevolence for its sake". The true benevolent should bear in heart sincerity for love and the true wise must show with practice their favor of benevolence. Responsible businesses should have the quality, culture and mind of the benevolent, as well as the attitude of gratitude and the idea of love. We should make efforts to give back to and benefit the society with inclusive philosophy and spirit of altruism. We should adhere to "self-discipline and social commitment". We believe that if we stand on the moral high ground to do business and make joint efforts with stakeholders, we will surely have a better and more harmonious

Chairman of CNBM Song Zhiping

Company Profile

As the leader of China's building materials industry, CNBM is the largest comprehensive building materials industry group in China. It has been ranked first among the top 500 enterprises in the building materials industry for many years, 50th among the Top 500 Enterprises in China, and 270th among the Fortune Global 500. Up to the end of 2015, the total assets of the Group amounted to RMB 432.65 billion and the total number of employees reached 176,610. In 2015, CNBM achieved revenue of RMB 199.25 billion with total profit of RMB 3.84 billion, whilst taxes paid amounted to RMB 11.91 billion.

Headquartered in Beijing, CNBM has over 1,100 member companies, and dominates 6 listed companies, including 2 overseas listed companies. Member companies of CNBM are located in 30 Chinese provinces, municipalities and autonomous regions, whose businesses cover over 120 countries and regions in the world.

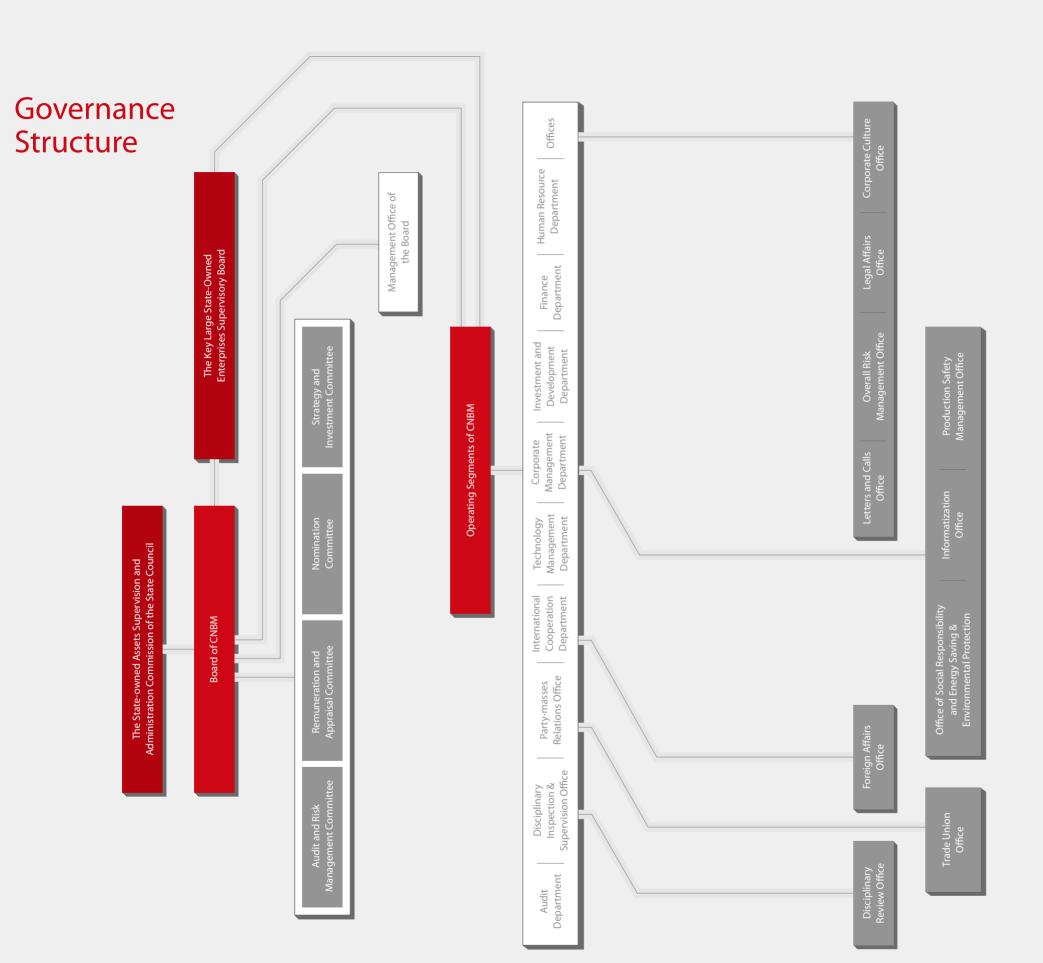

As an enterprise engaged in the highly competitive field, CNBM takes "efficient use of resource, serving the construction" as our core values, always follows market rules, strongly promotes structural adjustment, consolidation and restructuring, and energy conservation and emission reduction of such industries as cement and glass. CNBM vigorously develops new building materials, new energy-saving buildings, and advanced energy materials. CNBM has unswervingly followed the development path of capital operation, consolidation and restructuring, management integration, and integrated innovation. We have gradually established business segments of industrial manufacturing, research and design, engineering services, equipment manufacturing, logistics and trading, and new housing. We are committed to becoming a world-class comprehensive building materials industry group with sustainable innovation capabilities and outstanding international competitiveness.

Largest ready-mixed concrete producer in the world

Revenue of RMB 199.25 billion

Total profit of RMB 3.84 billion in 2015

Taxes paid of RMB 11.91 billion in 2015

Business Activities

The annual capacity of cement is about 400 million tons; ready-mixed concrete is 410 million m3, both of which rank the first in the world

Representative companies

China United Cement Corporation, South Cement Company Limited, North Cement Company Limited, Southwest Cement Company

The glass industrial platform can produce high-quality float glass with a processing capacity of 10 million m2, covering products of vehicle glass, architectural fabricated glass, and decorative glass. We can produce 15 ultra-thin glass products from 0.15 mm to 1.3 mm. We also have an industrial base capable of producing 40 million pieces of ITO electropane and TFT crystal glass substrates.

Representative compani

China Luoyang Float Glass Group Co., Ltd., Anhui Huaguang Photoelectricity Materials Technology Group Co., Ltd., Bengbu Design & Research Institute for Glass Industry

The light-weight building material industrial platform includes three business sectors, namely the wall and suspended ceiling system, the housing parts and architectural energy conservation system, and the exterior building envelope system. It provides application solutions pack for public buildings and family housing with its complete product system. It also possesses internationally recognized high-end brands and proprietary intellectual property rights, as well as 54 major industrial bases. Its annual productivity of gypsum plasterboard exceeds 2 billion m2, ranking the first in the

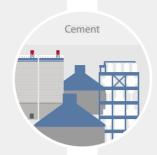

Representative companies BNBM Public Limited Compan

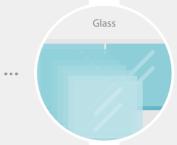

The total productivity of fibreglass has surpassed one million tons. We have several production bases both at home and abroad, and the world's largest alkali-free tank furnace production line with annual capacity of 120,000 tons. We also possess proprietary intellectual property rights of such packaged technologies as alkali-free tank furnace, mediumalkali tank furnace, recycling of wasted silk of fibre glass, etc.

China Jushi Co., Ltd.

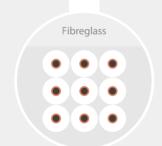

We have the 1,000-ton carbon fibre production line, which owns the largest scale and most advanced technology in China. We've reached the annual productivity of 10,000 tons of PAN silk and 5,000 tons of carbon fibre. We have China's first production line successfully producing high-quality T700 PAN silk and carbon fibre and T800S carbon fibre with good performance, with the productivity of T700 silk reaching 8,000 tons and that of T700 carbon fibre reaching 4,000 tons. We can produce ACCC conductor with a sectional area of 150 – 1,250 mm2, which can be applied in transmission lines of 35 – 1,000 KV.

Representative companies
Zhongfu Shenying Carbon Fibre Co., Ltd., Zhongfu Carbon Fibre Core
Cable Technology Co., Ltd.

We are a leading manufacturers of megawatt rotor blades in China, with a total capacity of 4,500 sets. Our products have 9 series and 58 types with categories varying from 1.25 MW to 6 MW, and length of blade varying from 31.5 meters to 75 meters. Our products cover all categories of products for land and marine use, and have been exported to dozens of countries and regions. We have blade production bases in Lianyungang, Shenyang, Jiuquan, Baotou, Hami, and Guizhou respectively, a R&D center in Germany, and a national blade testing center.

presentative companies

We establish a whole industrial chain of BIPV (Building Integrated PV) with a focus of thin-film solar products and technologies. We have several solar cell production bases at home and abroad. We have a 100-MW CIGS thin-film solar cell production base in Germany, and have developed several PV power stations in China, Great Britain, the United States, Thailand, and Japan respectively. We are committed to the integrated application of advanced energy materials and distributed energy and carrying out the R&D and application and dissemination of new-energy housing.

Representative companies

Bengbu Design & Research Institute for Glass Industry, China Triumph International Engineering Co., Ltd., CNBM Jetion Solar Technology Co., Ltd.

Our products include refractories of fusion-cast zirconia alumina and fusion-cast aluminum oxide series, and unshaped, basic, alumina-silica and silica refractories. We have a world's largest professional production base of fusion-cast refractory, whose annual productivity is nearly 40,000 tons, and an automatic production line of unshaped refractory with annual capacity of 100,000 tons. Our comprehensive strength, product quality and service are all at a leading level in the industry.

> Representative company Ruitai Materials Technology Co., Ltd.

As the animateur and promoter of the environment-friendly and energy-conservation new housing industry of China, we integrate R&D, design, production and installation with system integration, and have several product systems, including steel, wood, PC, etc. As one of the first national demonstration bases of housing industrialization, we have many demonstration bases of new housing in Beijing, Sichuan, Jiangsu, Hainan, etc.

Representative companies

Beijing New Building Materials (Group) Co., Ltd., China New Building Group Corporation

Logistics and trading

With our experience of new Internet technology and e-commerce operation, we have rationally and effectively integrated such services as suppliers of bulk building materials, logistics and transportation, insurance and credits, inspection and quarantine, etc. We provide comprehensive solutions covering all links of international trade, and have realized the online one-stop management of export services. We've become a comprehensive building materials service provider for the international market, and been listed as a key export support enterprise and key commercial distribution enterprise by MOFCOM.

Representative companies

China National Building Materials & Equipment Import & Export Corporation, Beijing New Building Materials (Group) Co., Ltd., CNBM Investment Co., Ltd.

Verification service

Backed by the Group's strong research and technical capabilities, the verification service business covers testing and verification services, including certification test, energy efficiency assessment, carbon assets checking, contract energy management, comprehensive utilization and evaluation of resources, production approval and evaluation of green building materials, energy-conservation building materials, and supporting building materials products for constructions. We provide technical guarantee for the QC of building materials products, and the sound and sustained development of building materials market.

Representative company

China Building Materials Test & Certification Group Co., Ltd.

Responsibility **Management**

We pay close attention to the expectations of stakeholders such as investors, government, employees, clients, partners, related groups, communities, media and the environment. We insist on the core philosophy of "efficient use of resource, serving the construction" and regard "innovation, performance, harmony and responsibility" as our core values. We insist on establishing a harmonious relationship with competitors, the nature, employees, and the society. We stress both technology and management innovation in our development, pursuing a coordinated and win-win situation with the market, the environment and the society, and constantly improving our capacity of holding responsibility.

Market **Performance**

We reward our shareholders and investors with excellent operating results, serve our clients with quality products and services, growing together with our suppliers and industrial partners, and providing a platform for all the stakeholders to create values. Meanwhile, upholding the philosophy of "industry interest overweighs corporate interest", we are dedicated to promoting industry restructuring, transformation and upgrading, and seek to achieve mutual development and create win-win situation with the industry and peers of the same industrial chain.

Market Performance

China National Building Materials Group Corporation 2015 Social Responsibility Report

Dealing with New Normal by Surmounting Difficulties

2015, just last year, was the most difficult year for cement industry during the past 25 years. In 2015, CNBM faced the most serious and complex situation and the most difficult tasks since the outbreak of financial crisis in 2008. The painful process caused by restructuring and difficulties in building up new driving forces were intertwined; low effective demands and a shortage of effective supply coexisted. We suffered intensified industrial overcapacity, weak market demands, sharp decline in prices, and severe cutthroat competition. And the

cement industry suffered a negative growth for the first time during the past 25 years, decreasing by 5.3% on a year-on-year basis, with a sharp decline in industrial economic benefits.

During the past year, we endeavored to overcome the difficulties of the decline in sales volume, price, and economic benefit, strengthen marketing, adhere to the concept of price-cost-profit and self-discipline conventions, and lead the industry to a development path with orderly competition,

price stability, energy, and sound operation. Concerned companies actively carried out three-dimensional competition-cooperation by region, category, and structure; we made efforts in the field of supply by conducting peak-shifting production and closing down some kilns for production restriction so as to address the imbalance between supply and demand, stabilize prices, expand sales volumes, and maintain market shares. We actively promoted the concept of sound

industrial development for the plateau of

new normal, and endeavored to create a

positive atmosphere with industrial selfdiscipline.

The whole management and all the staff of CNBM worked hard together. In face of heavy operating pressure, the Group's cement business didn't offer good performance, but compared with the overall situation of the sector, other basic raw materials industries, and most of comparable companies, CNBM's cement business offered a better performance. Gratifyingly, three new business sectors, such as rotor blade,

glass fibre, and engineering services, offered excellent performance. In 2015, the cost of cements sector declined by 11%. The performance of major products of three new sectors met expectations and took over the lead: the sales volume of rotor blades increased sharply; the sales volume of glass fibre increased by 4% on a year-on-year basis, offering excellent performance in price and cost, with retained profits increasing by 107%; revenue and gross profit rate of engineering services increased on a year-on-year basis.

Cost Reduction and Efficiency Increase

 In accordance with the operation principles of "early, refined, lean, practical", "four-emphasize, four-control, four-improve, four-reduce", "price stabilization, cost reduction, receivables collection, inventory curtailment, adjustment", and "quality improvement, efficiency increase, transformation, upgrade", we paid attention to increase stabilizing, internal enhancement and transformation promoting. We fully implemented cost and expense reduction plan and strictly control the scale of "finished goods inventory and receivables", with CNBM's competitiveness in cost and organization constantly strengthened; we actively carries out capital operation and strictly control debts, with capital expenditure and debt to assets ratio declining on a year-on-

- Quality improvement and efficiency increase, transformation and upgrade
- Four-emphasize, four-control, four-improve, four-reduce

CNBM's Four Principles for Operation and Management

- Early, refined, lean, practical
- Price stabilization, cost reduction, receivables collection, inventory curtailment, adjustment

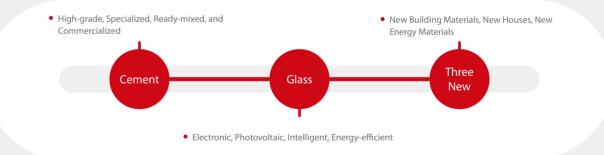

Refined ... Management

Transformation and Upgrade

We develop cement business in four aspects, with capacity of specialized cement reaching 20 million tons and that of aggregates hitting 30 million tons; we actively implement the strategies of "Internet plus" and "mass entrepreneurship and innovation"; CUCC Tai'an has established an intelligent cement mill with the production model of "cement + mouse" and "Internet + mine" achieved, which was given the title of "Demonstration Enterprise for Experiment of Intelligent Manufacturing" by Ministry of Industry and Information Technology of the People's Republic of China. The development of three-new business enjoys sound momentum. The technologies of light-weight and high-

strength building materials are fully popularized and market share in China hits 60%. In the field of rotor blades, we readjust the product mix, with the share of high-power blades in the sales increasing continually. In the field of glass fibre, we adhere to the strategy of internationalization and high-end products, with the share of highend products hitting 56% and its global market share exceeding 20%. In the field of engineering services, we speed up the transformation of traditional business and actively develop the market of emerging sectors, such as, energy conservation and environmental protection, new housing, and artificial intelligence.

The Belt and

 We actively participate in "the Belt and Road Initiative" and steadily advance internationalized operation. Priority has been attached to a number of projects along the counties of the Belt and Road, such as China Jushi's galls fibre project in Eygpt, CTIEC's cement project in Kazakhstan and glass project in Bengal, and Xi'an Research & Design Institute of Wall & Roof Materials' industrial park project in Congo. With global market development accelerated, CNBM has invested to expedite the development of BNBM HOME, an overseas chain operation mode. At present, CNBM has established 13 overseas outlets for the chain.

Responsibility Operation for New Development

- We insist on the working rule of lawful, compliant and honest operation. The Group has been awarded as AAA in credit rating for many years.
- We insist on fair competition without infringing competitor's or partner's rights by improper means or misconducts (fraud, bribery, malicious price cutting, etc.), and advocate building good partnerships based on free will and equality.

participated in legal publicity and

- Public companies truthfully, accurately, completely and compliantly disclose periodic financial data, significant matters and the matters required to be disclosed in accordance with Information Disclosure System issued by supervisory authority. In case that a company encounters an emergency possibly influencing its share prices, the secretary of the board of directors would organize study on handling, and timely disclose related information to investors in accordance with related procedure.

The Night Scene of 20,000 tpd Cement Production Line of CUC

- We provide material supports and technical services for national key projects and urban infrastructures, and systemic building materials solutions for residents' daily life. Through our various products, sufficient production capacity, reliable quality assurance, globalized marketing system and convenient and friendly service system, we offer customers returns beyond commercial values.
- Our member companies are instructed in the construction and certification of standard quality management systems, and implement quality management throughout the procedure from procurement of raw materials to delivery of products by QC group activities. We make public quality commitment and a customer evaluation & feedback mechanism is built. Customers are actively invited to get involved in product quality control, and we will compensate customers for their loss caused by the quality defect of our products.
- Service systems for pre-sales consultation. sales reception and after-sales service are well established. Complaints and inquiries from customers are responded to and handled without any delay. We own professional customer service teams and they regularly provide professional training for our agencies. Customer training meeting and product publicity meetings are held to deliver basic knowledge of green building materials, notes on selection and use of building materials, and knowledge of counterfeit identification to customers. With attention paid to protecting customer privacy, we execute a strict confidentiality system for customers' personal information.

- Keeping the responsibilities of leading enterprises in mind, we serve economic and social development, pay taxes, offer opportunities of employment, and support programs for public good, making contributions to national economy and harmonious development of the society.
- Under the concept of "industry interest overweighs and breeds corporate interest", we firmly curb illegal and blind capacity expansion, and practice expansion based on stock combination, technological transformation and upgrading based on increment input. and benefit creation based on management integration; we maintain balance between supply and demand in the market, execute industrial reconstruction, improve concentration ratio of the industry, and endeavor to create a new intra-industry ecosystem
- We establish long-term strategic partnerships

Energy Saving & Environmental Protection

We comprehensively utilize industrial and urban waste resource and manufacture low carbon products with minimal consumption and emissions; we are committed to providing the society with green and environment-friendly building materials with reliable quality and providing product and service support for new energy industry; we are delighted to share effective energy saving technologies and management experience, explore development mode for the industry and the nature to co-exist in harmony, and advocate sustainable development of the whole industry and society.

Green Operation

Compliance to Laws ... and Regulations

- We strictly abide by industrial access system, and resolutely close down outdated production facilities. We strictly implement the national quota on energy consumption, continuously improve the efficiency of energy utilization, and keep the energy consumption of main products at an advanced level. We strictly abide by standards on pollutant emission, improve monitoring and emission reduction systems, and ensure clean production and that the emission reaches the standards.
- Mining is carried out according to the Green Mine Convention. We timely carry out ecological restoration while developing limestone mines. We respect the Convention on Biological Diversity; carry out strict arguments on the site selections and layouts of factories; protect natural habitats, wetland, forests, corridors for wildlife and agricultural land during the construction of the projects; and

- reduce the adverse effect on surrounding environment and communities to the minimum.
- We strictly perform the approval procedures of project environmental assessment, implement the "three meanwhile" requirement of energy saving and environmental protection for fixed-asset investment projects, and earnestly organize and carry out the feasibility evaluation and environmental impact evaluation for new reconstruction or expansion projects. We establish the environmental risk warning mechanism, prepare contingency plans, and prevent and reduce potential environmental hazards.

Systematic ··· Management

53,000 person

53,000 person-times of employees attended training in regard of energy saving and environmental protection in 2015

13 on-site conferences were

replaced by video conferences in 2015

- 0 -

Mines are blasted by means of multi-row core short-delay blasting to reduce shock and resource waste. Mines are exploited by means of horizontal mining and stripping, by horizontal steps from top to bottom to prevent geological disasters.

Attention is paid to mine reclamation and plant greening to build state-level green mines and gardentype eco-factories.

Closed belt corridors are built to avoid dust flying and energy consumption in automobile transportation.

Components of mineral resource batches are accurately measured to establish reasonable proportions, effectively use low-grade ores, improve homogenization and give full play to value of mineral

resource.

Outdated production

The technological transformation of staged

combustion is carried out to improve energy efficiency meanwhile control production of pollutants

Hazardous wastes, urban refuses and sludge are copressed, and ecological services are offered. Electricity-saving measures like VF reconstruction of motor system, expert control system and peak-shifting production are taken to improve efficiency and safety

of electricity utilization.

Low-grade energy and renewable energy are made full use of. Flammable wastes like gangue, sludge and urban refuse are comprehensively used on production line to replace fossil fuels (coal, etc.).

Clean energy is selected to reduce the formation and emission of pollutants (SO₂, etc.) in waste gas.

(NOx, etc.).

The technology of bag-type dust collection is adopted to bring emission of industrial dust and smoke up to standard in waste gas.

With attention paid to water resource protection, water recycling is realized in both waste gas systems and cooling systems.
Auxiliary process water (washing water, etc.) is also effectively recycled through sedimentation and sewage treatment system. Industrial wastewater is drained up to standard.

Waste residues from production, reclaimed packing materials and non-conformity products are re-treated, and recycled as raw material after passing inspections. This realizes recycling of self-produced solid waste.

Industrial solid wastes are treated upon cooperation to reduce consumption of natural mineral resource.

Layout of production line is optimized. Measures like physical isolation, greening shield and occupational protection are taken to reduce noise, reach national standards on noise treatment and relieve the impact of noise on staffs and

communities around.

Cements in bulk and packing material minimization are promoted, and regional marketing systems are built to reduce energy consumption in transportation and packing.

Natural gas is selected as the fuel for transportation to reduce environmental pollution of tail gas. In-depth integration of industrialization and informatization is deeply promoted, intelligent factory construction is greatly promoted to achieve unmanned, intelligent and distant production control and energy-saving and

efficient operation.

Green Synergy

Going with Industry ... Chain

- We implement green procurement. In the procurement of raw materials, we give priority to products which are lowcarbon and environmentally-friendly in the production and have a lower degree of damage to the environment; when selecting energies, we choose clean energy, and vigorously promote the use of such non-fossil energies as low-grade energy, municipal refuse, biomass energy, etc.; when choosing daily office supplies and other consumer goods, we prefer products with simple packages and convenient for recycling.
- Provide green building materials products.
 We research and develop new building materials, which is carried out in accordance with four core concepts, namely energy

saving, safety, comfort, and ecology. We improve the quality of products, extend the service life of products, and reduce repetitive production. We develop and use industrial waste resources as raw materials to produce building materials to reduce the consumption of natural mineral resources, and achieve maximized recycle and effective disposal after service life. The new housing products not only integrate high-performance green building materials, but also joint seamlessly with new energy technologies and intelligent control technologies, thus turning into zero-emission, energy plus, future-core dream had the service of the se

7

12 technical service agencies of energy-saving and environmental protection

1 training base of building materials industry of national carbon market competency construction

Every "family" can be an "energy plant"

It has always been the dream of China National Building Materials Group Corporation to develop green building materials and build green constructions. In the nearly 40 years of exploration and practice, the Group has chosen new-type houses as supporting points to start a way for building green dream houses.

New-type houses refer to the kind of green building and manufacturing mode that is high-efficiency, high-quality, resource-saving (energy saving, water saving, materials saving and land saving) and less-polluting with new-type environment-friendly building materials as well as with standardization, normalization and refinement as productive criterion, modular coordination and information technology equipment system intelligentization

as basis, large-scale manufacturing of house components as industrialization means and onsite mechanized assembly construction as mode of operation. Compared with the conventional brick-structure houses, new-type houses have such physical performance advantages as safe structure (anti-seismic and wind-proof), heat insulation and recyclability, so the residence comfort has been greatly improved.

In recent years, China National Building Materials Group Corporation has developed Energy Plus 5.0 House on the basis of "zero energy" houses. Green, environment-friendly and recyclable newtype building materials have been adopted in Energy Plus 5.0 House instead of high energy consumption materials. Such houses have combined effective utility of energy with the concept of network and intelligentization in an effort to seek for high-end and humanity design. Not only can self-sufficient energy resources be achieved, but the energy can also be exported by effectively integrating 1.0 terrestrial heat, 2.0 photo-thermal, 3.0 photoelectricity, 4.0 domestic wind power and 5.0 marsh gas and other clean energy. In the meantime, such systems as smart home, central ventilation system, sewage treatment and rainwater collection can also be fully integrated to build "green ecological intelligence" houses. Self-sufficient energy and intelligence demand plan can be customized in accordance with the clients' requirements so as to make the dream of making every family to become an energy plant come true.

- We establish the information open mechanism. We disclose annual energy saving and environmental protection performance via annual CSR reports, and accept the supervision of stakeholders.
 During the feasibility study, construction, reconstruction and acceptance of project, we take advice from residents nearby and stakeholders in the region, and reduce the adverse impact of operation activities of enterprises on the environment and society to the minimum.
- Keeping the responsibilities of enterprises in mind, we endeavour to become a practitioner, fugleman, and advocator in coping with climate change. We actively undertake national energy saving and emission reduction missions, have initiated and signed conventions and written proposals, and advocate responses to
- climate change, environmental protection, dust-haze treatment, and low-carbon development. We also advocate and implement peak-shifting production, relieve the problems of overcapacity, and explore the sustainable development.
- We are active in environmental protection welfare and publicity activities, doing our best to promote environmental protection concepts; we donate money and supplies to support the construction of environmental protection facilities.
 We develop ecological forests with local community entities to jointly cope with climate change; we actively promote the knowledge of energy conservation, lowcarbon life and green consumption.

752
In 2015, we organized or participated in 752 publicity events on environmental protection

Employee **Care**

We make every effort to safeguard the rights of our employees, respect their differences and make the company a reliable partner, and a happy and comfortable home for the employees. We try to build a sustainable and better future together with all our employees and deliver our happiness to the society.

Safety

We have established a domestically top-ranking management system for safe production with safe production accountability system as the core, the standardization of safe production and the post safety technical regulations as the emphases, troubleshooting and treatment of accident potentials as the methods, the informatization of safety management as the tool, and the development of safety culture as the guarantee, to ensure the safe production and occupational health of staffs.

Safety ··· System

- We set up the organizational system for safe production with the principles of comprehensive coverage and practicality. The managers in charge would be the primary persons responsible for safety in the workplace and take charge of safe production matters. All key production safety enterprises within the Group employ full-time production safety management personnel. We establish smooth channels for feedback, and encourage all staffs to participate in safety management.
- We attach great importance to building up a safety management team. We have continuously fostered the sense of responsibility and awareness of safety procedures in the workplace and improved the professional quality of safety management personnel. We strictly follow CNBM Safety Training Rules, ensuring the popularization of safety knowledge, the execution of safety procedures, the

implementation of contingency plans, the knowledge of occupational hazards, and the self-protection abilities through training and assessment.

 We give importance to investment in safety in order to provide financial support for improving and maintaining the safety equipment and facilities, implementing technical innovations for the purpose of essential safety, organizing training in safety procedures, spreading safety culture,

124,000 person -times

124,000 person-times of employee received training in occupational health and safety in 2015 570 million

About RMB 570 million was invested in occupational health and safety in 2015

Security ... Mechanism

- We have established safety production management system covering penalty for safety violations, etc. We have also introduced special regulations and work guidelines for managing occupational health, major hazard sources, overseas projects and non-coal mines, etc.
- We implement the standard safety management, and actively push member companies to implement occupational health system certification. As a national pilot enterprise in standard safe production, we actively promote the work of reaching standards of standard safety of cement enterprises, improve the safety management system, increase the safety management level, and boost the safety management performance.
- Intensify the check of hidden dangers. We take the development of "capacity to reject and prevent hidden hazards" as an important part of the effort to improve the basic management level of enterprise safety, and promote the closed-loop control, composed of "basic capacity buildingassessment and control of latent dangers of accident—work and performance reward assessment—the ability to enhance the safe operation", to achieve the PDCA's continuous improvement. We explore and establish a six-in-one screening and governing system of accident potential, the six respectively being "focusing on the job responsibilities fulfillment, using listed investigation standards as a tool, taking the close-loop self-examination and self-reporting of hidden hazards as the means, basing on team construction and all-staff participation,

- taking reward and punishment system as the safeguard, and being supported by information-based management tools".
- Informatization technology is applied for the purpose of safe production management. The safety management information system independently developed by CNBM has also been included as one of the "Integration of Informationization and Industrialization" key projects by the Ministry of Industry and Information Technology, Online management has covered all key procedures and links of safe production management, including qualification management for safe production, basic files of safe production, eadication of hidden dangers, danger source management, safety checks, and safety training.
- We continue to improve the emergency management system. In the system that covers all layers of the Group, the Group's emergency management team takes the general charge, while the emergency management teams of the member companies would be responsible for specific measures. A comprehensive emergency response plan is established, supplemented by special emergency response plans and on-site response schemes. We organize member companies to check the reserves of emergency supplies regularly, take emergency response drills, and give on-site instruction on emergency response work.
- We actively organize safety promotion activities like "Safe Production Month" and "Safe Production Year", prepare and issue safety culture manuals, and incorporate the

idea of "people first and life foremost" into the corporate culture.

 We attach great importance to safety and occupational health management of suppliers and subcontractors, include terms on safety and occupational health into service contracts, and cooperate with companies in the supply chain to carry out routine safety checks, training, emergency response drills, and culture transmission.

63,000 person-times

 $63,\!000$ person-times of employees participated in emergency response drills in 2015

30.8%

Recordable injury rate per 1,000 employees was decreased by 30.8% on a year-on-year basis in 2015

97.1%In 2015, the completion rat of physical examination of

employees reached 97.1%

Occupational ··· Health

- We have installed and optimized supporting facilities for dust prevention, gas defense, noise reduction and emergency alerts as well as first-aid equipment in the production place, based on our in-depth study and analysis on the features of building materials production. For the purpose of labor protection, we offer labor protection articles, which are put in place and replaced in a timely manner to ensure their efficacy.
- It's an established practice to organize employees to take health examinations, arrange extra heath checks for staffs in jobs with exposure to dust or radiation, establish Personal Health Record and keep
- We gradually incorporate mental health into the occupational health management.
 We encourage member companies to set up mental health consultancies or cooperate with mental health institutions to build health record archives and pay attention to the mental health of our employees.

Improving attentively and restarting

In 2015, production safety accidents happened in two member companies of China National Building Materials Group Corporation. After the accident, the Group rescued the employees and comforted their families immediately; reported the accident conditions in a serious manner, investigated and analyzed the accident causes thoroughly and seriously punished the responsible persons. The Group has also requested that all the member companies including those where accidents happened investigate and implement enterprise entity responsibilities seriously, further establish and improve regulations of safe production in accordance with such legal provisions as Law on Safety in Production and Safety Production Management Regulations, strengthen the on-site

safety management and eliminate hidden troubles of production safety from the source. Supervision and accountability on commanding against rules, illegal operations and violation of labor discipline should also be enhanced. The Group should make every effort to investigate hidden troubles of production safety and urge those with potential safety hazards to rectify and reform immediately to ensure safe production, strengthen employee safety training and ensure the blind-angle-free training, enhance the examination, supervision and training of outsourcing labor employment, treat the production safety accidents with sincere and positive attitudes, take this as a lesson, make attentive improvements and restart, ensure life health of the employees and safe production of the Group.

7

2 production safety accidents happened in 2015

Dignity

Equality ...

- We respect and support the international covenants on human rights and labor standards, strictly forbid forced labor and discrimination, guarantee a decent working environment for employees, and strictly prohibit and reject employing child laborers in any form.
- We adhere to equal employment, respect and equally treat employees of different nationalities, ethnics, genders, ages. religions and cultural backgrounds. Employees are recruited and employed in an open, fair and impartial manner.
- In line with the principle of equal pay for equal work, we equally treat part-time employees, day laborers, and the workers of our subcontractors. Their legitimate rights and interests are well protected.
- We respect the privacy of employees, and have established a privacy management system covering such management links as recruitment, assessment, health records,

In 2015, the number of female employees reached 41.000

employees reached 3.521

In 2015, the number of disabled employees reached 1,449

Happiness

Sense of ··· Identity

• We spare no efforts in the construction of learning groups. We aim to build a multi-channel, multi-form, multi-level and differentiated employee cultivating and training platform. Following the training approach of "based on internal training and supplemented by external training", we share the education resources to build a comprehensive training system for the Group. We support the autonomous training of employees and encourage them in active learning. We also support and guarantee the re-education, re-training and

re-learning of employees from the aspects of working hours, training investment and reward mechanism.

 We attach great importance to the quality training of employees. Apart from encouraging vocational education and training, we create unique model for quality promotion of enterprise talents and establish unique corporate culture system to improve employees' executive ability, professional quality and cultural identity.

companies with an average salary higher than that of the local level was 53% in 2015

In 2015, our employees attended training for 1.33 million hours

Humility, reverence. gratitude and decency

Code of conduct

Cultural environment

San Kuan San Li

- San Kuan: Leniency, tolerance and ease
- San Li: Unity, affinity and cohesion

Sense of ··· **Achievement**

• We establish a scientific remuneration system and incentive mechanism and set a competitive salary standard. We also set two career paths for employees' promotion, leading to management positions and technical positions respectively. through which we manage to meet the development needs of different kinds of talents by allowing the talents from different fields and with different specialties to give full play to their expertise.

• We implement the mechanism of intragroup communication and on-position learning for employees, thus effectively allocating the human resources within the Group and providing a broad platform for the employees to develop their careers.

• We encourage enterprises to carry out corporate pension plans and diversity of equities according to the actual situation. We spare no effort to motivate the employees and retain the talents, and meanwhile, improve their sense of achievement by allowing the employees to feel the development and growth of our enterprise together.

Four Elaborates

• Be elaborate in conducting oneself, handling affairs, exercising authority and making friends

Cadres Norms

Vocational demand

Three Stricts and Three Steadies, Wu You Ba Jiang

- Three Stricts: Be strict in cultivating one's moral character, preventing abuse of power and disciplining oneself
- Three Steadies: Be steady in planning matters, starting undertakings and conducting oneself
- Wu You: having learning ability, market awareness, professional attitude, professional level and ideological level
- Ba Jiang: sticking to politics, overall situation, undertakings, dedication, solid work, actual effect, honesty and self-discipline

Legal **Compliance**

- In strict compliance with "Labor Contract Law of the People's Republic of China" and relevant laws and regulations, we sign labor contracts with our employees and standardize the labor contract management.
- We pay basic pension insurance, basic medical insurance, unemployment insurance, work injury insurance, maternity insurance and other social insurances for our employees in accordance with laws, and establish schemes of supplementary medical insurance, corporate pension, and

periodical physical examination system. We also encourage our member companies to purchase accident comprehensive insurance and other supplementary insurances for employees in line with their actual conditions

• We adopt a paid leave system according to such related regulations as Regulations on Paid Leaves of Employees, and pay remuneration for overtime work.

In 2015, the ratio of average salary of male employees to that of female employees was 3.4:1

In 2015, the total amount of remuneration for overtime worl

was about RMR 0.19 billion

Democracy ...

- We keep widening our trade union network, set up and improve the trade union organizations and work organizations at all levels; develop members of these organizations, and make trade unions more attractive and cohesive.
- We support employees to express their rational appeals and safeguard their own rights in such aspects as laboring, labor remuneration, work time, rest and vacation, work safety and health, social insurance and welfare, special protection for female employees, etc, through collective bargaining, signing collective contracts and other forms.
- We implement the Workers' Congress system, implement regulations on disclosure of factory affairs, and ensure employees' rights regarding participation, information and supervision. We share the corporate operation information with the employees through channels such as the disclosure board of factory affairs, employees discussion meetings, manager's mailbox and the company's website.

In 2015, our coverage rate of collective bargaining and contracts was approximately

94.9% of the proposals of the Workers' Congress were handled

and settled in 2015

Sense of ... Belonging

• We care for the health and life of female employees, and treat them equally with male counterparts in salary, management position, professional training and vocational development opportunities. We buy maternity insurance for them. and provide antenatal examination leave, maternity leave, breastfeeding leave, and birth allowance to female employees. We are concerned about the life and mental needs of young employees. We bring young people together through the communist youth league, providing them a platform to demonstrate their talents and exchange ideas. We care for the work and life of expatriates, especially those who station abroad or in the communities of minority ethnic groups for long, hold special after-work activities and provide mental health counseling so as to relieve their pressure. We also improve the home leave system to remove their worries from behind and promote happiness. We respect disabled employees, and provide them with a convenient working environment and necessary amenities.

• We improve the system of employee support and relief, and help employees to overcome difficulties through "the Mutual Fund for Combating Serious Illness", "the

Golden-autumn Grant-in Aid" and "the Sunshine Employment Program", etc. We do practical things, solve tricky problems and do good deeds for employees in difficulty, and make such actions regular, institutionalized and standardized. We stick to the custom of visiting needy groups in winter and two major festivals, mainly including childless and widowed elderly people, families of martyrs and poor retired employees.

 We encourage member companies to strengthen the construction of gymnasiums, recreation rooms, libraries and psychological counseling rooms. We also organize colorful cultural and art activities, sport competitions, visits and educational tours, and special educational activities, offering a broad stage for the staffs to show their gifts and improve their capabilities of beautifying themselves, operating their families and returning the society. Through continuously improving employees' physical qualities, cultural literacy and life qualities, we strive to make the company a happy and comfortable home for staffs.

RMB 7.09 million was spent to help and reward special groups of employees in 2015

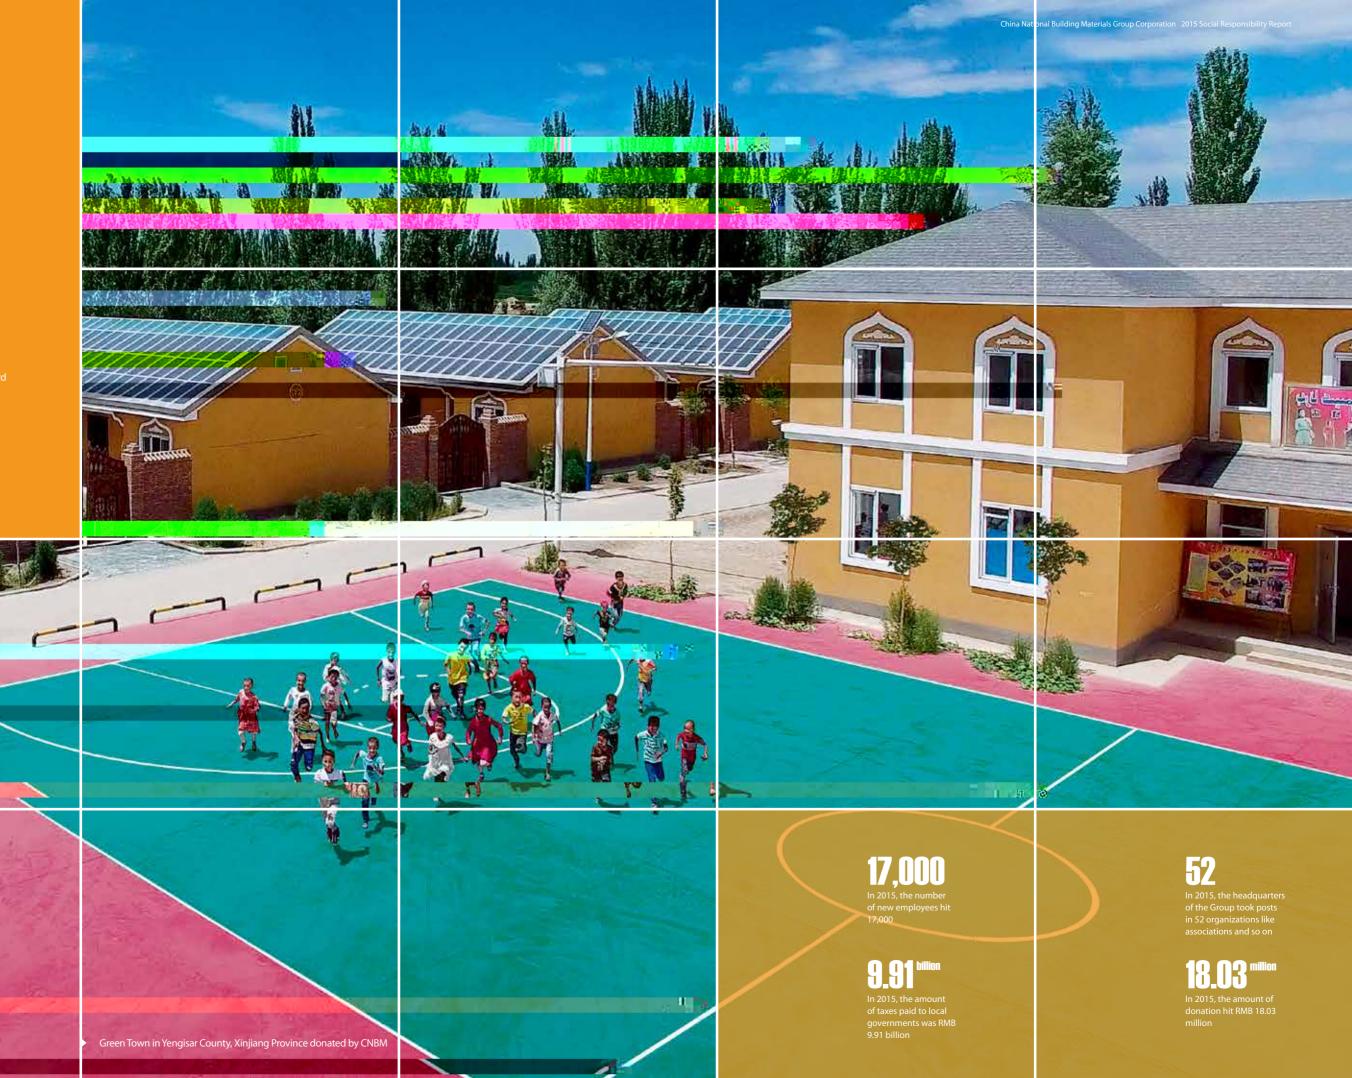

7.777 person-times of special groups of employees received help and rewards in 2015

In 2015, we organized 178,000 person-times of employees to participate in various cultural and sports events

Corporate Citizen

During production and operation, we seek to achieve mutual development with the region where we operate. Our accomplishment cannot be achieved without the support of the stakeholders and people from all walks of life; we rewar the society through unique social welfare projects. Our employees are delighted to make contributions and dedicated to volunteer activities, exercising their responsibilities as corporate citizens with their actions.

All-win Harmony

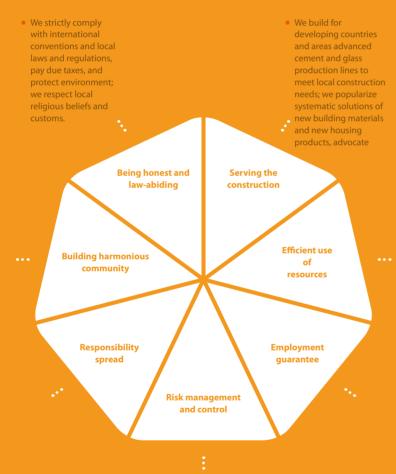

We have established the overseas operation system with characteristics of CNBM and integrated the concept of responsibility and sharing into the business activities. Particularly in the practice of overseas business, CNBM has abided by local laws, respected the local culture, made good use of local resources and served for regional construction, safeguarded the rights and interests of shareholders and the safety of employees through effective risk management and control system, spread the

concept of responsibility through sunshine procurement and sharing cooperation, considered environmental protection and the quality of life in a comprehensive manner based on the regional civil interests. The responsible and sustainable business philosophy makes us highly recognized and fully accredited in local areas as we engage in "going out". When practicing "the Belt and Road Initiative" in the future, we should strengthen the cooperation in such technical

fields as the Internet, informatization and intelligentization, improve the industrial chain integrated with investment, construction, operation and follow-up services based on set of equipment and technical services and practice social responsibilities in overseas

CNBM Overseas Responsibility **Operation System**

- We strictly carry out the impact assessment of new projects, reconstruction ones and expansion ones fully solicit the views of interested parties on the economic and environmental benefits, and minimize the negative impact of business operations on the environment and society; we actively participate in local public welfare and community activities to create a favorable image.
- bidding and lawful procurement: we evaluate the busines capacity, credit status and management of our sub-contractors and cooperate with that have good performance in social contracts, we explicitly stipulate the protection of lawful rights and safety and health of employees of subthe management contractors shall be strictly executed.

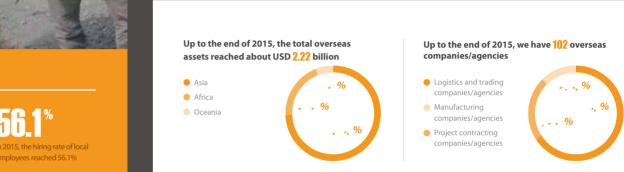

• We strengthen the management of overseas enterprises and projects, All-round system covering risk companies face is established, including political risk, country risk, financial risk, lega risk, risk concerned

with bidding, tax risk, labor service risk, and industrial risk, as well as an with risk analysis and emergency mechanism to guarantee safety of staff and assets.

ideas and provide support for energy saving construction products; we construct large logistics parks and selling networks providing systematic trading service to distribution of regional resources.

We make good use resources, combine them with enterprise technologies and advantages to create a value chain with a provide value-added space for the raw material suppliers and product vendors in the local economy, and create tax revenue

We advocate management for providing employment opportunities to local areas, training local employees and popularizing advanced philosophy, with a view to improve the quality

In 2015, the total volume of exports reached USD 1.66 billion

China National Building Materials Group Corporation 2015 Social Responsibility Report

"Green town" overseas

"Everyone is talking about green buildings, but no one knows how to build them." 58-year-old Spanish entrepreneur Caesar Mattinal said in an interview. Mattinal's grandfather established the family construction company in Barcelona in 1916. About 10 years ago, Mattinal started to try to combine green solutions with the planning of economically affordable housing. His dream has not come true until he cooperated with CNBM

The Copiap new housing project in Chile constructed by CNBM in cooperation with Barcelona Housing System Company is the first residential building of light steel structure and "new-type house + new energy" mode in Chile with such features as "anti-seismic, environmentfriendly, energy conservation and comfort" which is particularly suitable for countries with many seismic zones as Chile. CNBM has promoted the products of "green town" all over the world and been committed to providing the global citizens with Energy Plus 5.0 House to make them enjoy energy-saving, environment-friendly, comfortable and safe houses and at the same time, to realize the good wish of sustainable development

together. CNBM has been working with Barcelona Housing System Company to build 8,000 green

Sunshine Welfare

We firmly believe that a responsible social welfare system is the basis for promoting social justice and for central enterprises to fulfill social responsibility, and more importantly, it is an important measure to protect the interests of investors and the safety of state-owned assets. In the principle of being accountable for beneficiaries and shareholders, we carefully assess invitations for social welfare support prior to implementing any donation and cautiously

select projects to support in order to guarantee the public rights and interests by evaluating importance of projects, reliability of executing units of projects, and public benefits of projects as well as our annual business performance; we reject apportioned, duplicated, ineffective, poorly run public welfare projects as well as ones that are beyond the enterprise's capacity to ensure public interests. We respond to national calls to seriously promote poverty reduction work

in specific areas, give special attention to the development of environmental protection and education; at the same time relying on the support from Communist Youth League organizations, we continue to promote volunteer activities, and have achieved positive results.

Donation ... Standardization

- We establish emergency response mechanisms, to provide first-time disaster relief, civil defense and other public safety matters.
- We provide support for disaster affected areas, poverty-stricken areas, science, education, culture, and hygiene causes, welfare projects, and environmental protection causes in kind and capital, so as to support the development of society.
- We standardize donation management regulatory. We establish and improve the donation organization and management system, and strictly implement the annual budget and procedure for examination and approval of process; we have established a mechanism for periodically analyzing and reporting the donation project progress, evaluating effects and conducting return visits when the project ends, and reject apportioned, duplicated, ineffective, poorly run public welfare projects as well as ones that are beyond the enterprise's capacity, so as to focus on the donation's effect and guarantee the interests of investors.

672,000

In 2015, the total amount of input in environmental protection and public welfare reached RMB 672 000

18.03 million

Total foreign donations in 2015 reached RMB 18.03 million

332

In 2015, the number of foreig donation projects was 332

Innovative Poverty ... Alleviation

• We always focus on poverty reduction to fulfill our social responsibilities as a enterprise Since 2002 CNRM has established site-specific poverty-reduction relationships with Shitai County of Anhui Province, Jingyuan County of Ningxia and Zhaoyang District of Zhaotong City, Yunnan Province. By donating poverty alleviation funds, we help local areas to withstand natural disasters, improve educational environment, solve housing difficult, repair roads and build electricity and water conservancy facilities. Meanwhile, in order to help poor areas to rid themselves of poverty completely, the Group actively transforms poverty reduction thinking

and creates new modes to reduce

Voluntary Activities

 We advocate a harmonious social atmosphere, and encourage our employees to provide voluntary services and participate in social welfare activities. We provide guarantee and support for voluntary activities in such aspects as organizational structure, work mechanism, scheduling, financial support, communication and liaison, etc. Under the volunteer service system with the Communist Youth League at the core, companies at different levels establish several volunteer activity groups, carry out varied volunteer activities, which demonstrate participants' enthusiasm and spread happiness.

In 2015, the input in voluntary activities reached about RMB

15,000 hours of volunteer services were provided by our employees in 2015

Ê

Fires are ruthless while people are not, and enterprises are all in the family

At 10:00 on June 9, 2015, not far away from the southeast of China United Cement Dongping Co, Ltd, a member company of CNBM, waves of smoke went straight to the sky suddenly. The situation was grim on site for over ten acres of wheat field were burned and the all-year harvest of villagers went up in smoke. Once new wheat fields were swallowed, the village across the path was bound to be in danger and if the fire continued to spread without control, the consequences would be unthinkable. China United Cement Dongping Co., Ltd started the fire emergency plan immediately. Hundreds of trained and adequately-protected fire-fighting volunteers gathered quickly and rushed to the site. Volunteers helped the panic-stricken villagers to evacuate in an orderly manner while devoting themselves to the fire fighting by drawing water to put out the fire and setting isolation belts to control the fire. At around 11:00, through nearly one-hour fighting, the fire was put out. Volunteers of China United Cement Dongping Co., Ltd investigated the scene of fire carefully in order to make sure

is a member of Taian City, China United Erment Dongping Co., Ltd has both the marke invironment of survival matter as well as the ultural environment of production and living natter.

china United Cement Dongping Co., Ltd has always adhered to the concept of "cooperation, nutual assistance and harmonious coexistence", held fast to the selfless and fearless humanistic are of difficulty from one direction, support from all direction, and regarded it as a kind of consciousness, responsibility and mission to return the society, contribute to the local and make the esidents united. Three bright red banners saying true love shows in time of danger and true heroes are righteous and courageous", "brave fire-fighting nakes residents safe and assistance in danger aways weighty as a mountain" and "fires are ruthless while people are not optomized to the local street of the safe and safe and safe are all in the

amily" have expressed villagers' simple but sincere eelings for China United Cement Dongping. Sang 'eng, the deputy secretary of party committee of he company in Ditimen Town said movingly, "We nave seen Dongping's demeanor as an enterprise o have the courage to fulfill social responsibilities in the fire-fighting emergency event on June 91"

17.9%—A new record of green energy

As a core enterprise of thin-film solar technology innovation and manufacturing of China National Building Materials Group Corporation (CNBM), the German company Avancis has outstanding technical advantages in Copper Indium Gallium Selenide (CIGS) and cadmium telluride (CdTe) thinfilm solar power. Technical system of Avancis is very

suitable for Building Integrated Photovoltaic (BIPV) applications. With low consumption of resources and no harmful substances during manufacturing process, it has obvious energy saving and environmental advantages when integrated into building facades and roofs.

Avancis R & D center in Munich has developed a

300mm×300mm CIGS thin-film solar cell, which renewed the record of photoelectric conversion rate, reaching 17.9%. Avancis continued to improve the photoelectric conversion rate, which will greatly enhance the competitive advantage of thin-film solar cells in the photovoltaic sector, improve solarenergy development and utilization potential of confined space and provide better product solutions for new green energy industry.

Property ... Protection

 Focusing on such aspects as the protection of intellectual property, and the management of scientific research funds, we have combined the development of internal control system with the requirement of risk management, and formed a scientific research management

Talent ... Stimulating

 We have gradually established the talent development mechanism to promote the development of talents, and the assessment and reward mechanism according to their performance and contribution. Inside the Group, we provide "Scientific and Technological Progress Award", "Technical Improvement Award" and "Group Technical Center Project"

Collaborative Innovation

 We attach great importance to cooperation with famous universities and professional institutions in jointly tackling key problems, technical cooperation, academic exchanges, talent cultivation, incubation and transformation of achievements, etc., establishing an innovation alliance with various levels.
 We explore the establishment of an open scientific research system. Aiming at research hotspots and challenges which attract attentions from the country and the industry, we mobilize social technological system which conforms to national requirements of scientific research management and has the feature of building materials industry, providing the efficient progress of scientific researches with mechanism guarantee.

to boost researchers' enthusiasm for innovation. We have established the Youth Science Foundation, and organized youth scientific research competitions to promote fast grow of young backbones of scientific research and inject vigor into the scientific research teams of the Group.

Sharing and Services

507 academic exchange activities were held and organized in 2015

Leading Spread

 We undertake secretariat work of standardization organizations, industrial organizations, professional societies and scientific agencies, and lead technology innovation and industry revolution of the professional sector. We develop extensive science services. Industry websites and professional publications are run to timely publish frontier information

Open Services

We actively build service platform system
of industry open style, have formed a
comprehensive technical service platform
system of building materials industry
integrating industry-wide inspection
and certification resources, industrial
products quality control and technical
evaluation laboratories and national public
service demonstration platform for SMEs.

Sharing & · Exchange

 To give a play to our role as a demonstrating base for international scientific and technical cooperation, we hold overseas and domestic academic meetings, run forums, develop activities of exchange and visits to offer platforms of communication and promotion to specialists and scholars, serve innovation and common progress, accelerate technological upgrading and reform in the industry and related fields, and and share technological results and commercial messages. By building resource repositories (technical innovation institutional repository, technological result database, etc.) and information inquiry platforms, we offer multiple channels of information exchange and technical communication to building materials enterprises.

The system provides for SMEs services including inspection and detection, management system certification, standardization, technical product development, intellectual property and brand building, promotes advanced practical technologies and provides entrepreneur services.

motivate technological innovations to faster and more effectively serve sustainable development of the society. We also undertake professional exhibitions to collectively exhibit and recommend new technologies and products, offering platforms and services to the industrialization of technological results, thus pushing technological progress and result sharing in the industry.

Cement "Olympic" has finally come to China

In October, 2015, China Building Materials Academy undertook 14th International Congress on the

Achievements and Transformation

Enterprises as the Main Body

 In recent years, the Group has continuously been approved as a state-level enterprise technical center of composites, equipment manufacturing, glass fiber, cement equipment and special cement and other fields, formed a technological innovation system composed by one national enterprise (Group) technology center (CNBM Technology Center) and seven state-level enterprise technology subcenters, ranking first among central enterprises. The Group has formed six professional R&D departments, strengthened core traction function of the industrial sector and independency right of R&D, enhanced production-study collaborative innovation and scientific and technological achievements transformation in this sector, and established technology clusters integrating advanced production technology, core technology and equipment and inspection and certification services

0

We have scientifically set the research direction based on technology productization, product marketization and market efficiency principles. We give full play to the advantages of integrated production-study-research platform, closely link industry and market to respond to market demand without any delay and scientifically plan R&D direction and technical research focuses. Our R&D achievements have solved the technical problems in the production process, met higher standards of market demand and provided a guarantee for R&D achievement

Market as Guide

Combination of Production, Study and Research

 We accelerate R&D application and benefit transformation. Relying on special cement technology of Key Laboratory of Green Building Materials, we have achieved special cement's industrialization promotion among four cements of the Group, become the largest manufacturer and supplier of special cement, and widely adopted it in power plants, oil and gas fields, harbors, high-speed railways and other major construction projects, with direct economic benefits reaching a billion dollars; relying on technological achievements of national science-technology support projects being successfully appraised as capital stock of CNBM Neijiang High-tech Company, we have achieved industrialized production of series Low-E products. Harbin FRP Institute has, through production-study cooperation

with Zhongfu Lianzhong Composites Group Co., Ltd., incubated Zhongfu Carbon Fiber Core Cable Technology Co., Ltd. with carbon core cable technology and become a qualified supplier of State Grid Corporation of China, with accumulative sales of products exceeding 3,000 km. Development during the 12th Five-Year Plan

Development during the 12th Five-Year Plan

During the 12th Five-Year Plan, to achieve the strategic objective of "to be stronger and better, to be globally top-ranking", CNBM actively transformed the business mode, adjusted the structure, deepened the market-oriented reform, pressed forward with the structural adjustment, combination & restructuring, energy saving and emission reduction in the cement and glass segments, and made great efforts to develop new building materials, new houses and new energy materials. By this, remarkable achievements have been made to lay a firm foundation for the development during the 13th Five-Year Plan.

- In the period, the board of directors played the important role of strategic guidance for rapid and healthy development of CNBM, through strategy developing and regular governance. All the directors worked scrupulously, and racked their brains to give suggestions on operation and development of the group.
- In the period, we made efforts to build CNBM as a top-ranking enterprise by adhering to the concept of "to be stronger and better", which was an extension of the previous concept of "to be bigger and stronger". In the process of growth from a grass-roots enterprise to a Global 500 company, CNBM increased its operating income and total profits by 242% and 252% in comparison to the 11th Five-Year Plan, respectively. At present, CNBM is ranked 1st in the world in production capacities of 4 segments (cement, etc.), and ranked 1st at home in production capacities of a few other segments, and have worldclass capabilities of engineering design, engineering service and equipment manufacturing.
- In the period, CNBM made many noteworthy achievements in technological innovation, and built up a world-class technical innovation system. On the basis, breakthroughs were continuously made in key technology, significant achievement and product application, meanwhile the numbers of major topics, rewards for technological progress, patents and standards increased a lot. Thanks to this, CNBM now firmly occupies the commanding heights of multiple
- In the period, we kept improving our influence, driving force, brand awareness and international reputation, and our development concept and growth history attracted extensive attention.
 CNBM is honored as a flag that guides the industry to healthily develop, a paving stone for enterprise reform and a corporate citizen active in responsibility fulfillment.

Reform

Transformation

Growth

Innovation

Responsibility

For more information about the practice of responsibility fulfillmer during the 12th Five-Ye Plan, please scan the 2E barcode.

- In the period, we accumulated rich experience in capital operation, combination & restructuring, management integration, reform towards diversified ownership, internationalized development and cultural development, and formed a complete, unique, effective operation management mode that features integration & optimization, marketization of centrallyadministered SOE, meshed control, the "8 techniques", the "six-star enterprise" and the "income-increasing, cost-saving, consumption-reducing" methods.
- In the period, we actively and steadily carried out the Go Out policy to boost the implementation of the Belt and Road Initiative. In the process, our service of international engineering project (glass, cement, new building materials, new energy materials, etc.) covers the markets of Europe. Southeast Asia, Middle East, Africa and South America. In particular, the Egyptian glass fiber project, the German wind turbine blade project and the German solar energy project have brought satisfactory benefits, and the modes of "cross-border e-commerce + overseas location", intelligent industry, intelligent port and BNBM HOME are being laid out at a higher speed.
- In the period, starting from publishing the first social responsibility report, we built a social responsibility organization system. Besides, we conducted the management of interested parties, regularly published social responsibility reports, built the 5 responsibility framework systems, persistently improved the capability and effects of responsibility fulfillment through continuous practice, conducted responsibility research, and joined responsibility advocating organizations and action plans to promote responsibility communication and sharing. On the basis, CNBM developed into a practitioner, driver and guider of social responsibility.

Development History of CNBM

- Solved the debt crisis and the problems left over by history, pushed strategic transformation.
- Renamed "China National Building Materials Group Corporation" in 2003, marched into the mainstream segments (cement, glass, etc.) from the minority segment (decorative building material).

Strategic adjustment

From "to be bigger and stronger" to "to be stronger and better": to become the Globa top 500 for the first time in 2011; to establis the strategic objective of "to be stronger ar better to be globally top-ranking"

Promoted integration and optimization in depth: proposed the concept of "integration, optimization, efficiency improving, deleverage" and the principle of "early, refined lean, practical", popularized the summarized internal management methods including meshed control, the "8 techniques" and the "six-star enterprise".

Steadily carried out the Go Out policy, accelerated overseas market layout, boosted the implementation of the Belt and Road

Healthy growth

Strategic transformation

Rapid development **2005**_**2010**

Infrastructure construction

987_9009

Founded a range of new building material enterprises (gypsum board, rock wool, plastic floor, wallpaper, sanitary fittings, etc.) to make contributions to the development of the China's building material and construction industries.

- ZUU5-ZUIU
- Designated as a pilot enterprise of wholly state-owned company's board of directors, entered the stage of regular governance and stable development.
- Went public in Hong Kong upon the dual driving of capital operation and combination & restructuring, built a capital operation platform.
- Restructured thousands of enterprises, became a leader in the fields of cement, gla gypsum board, wind turbine blade, new
- Built a CBMA-centered innovation platform to accelerate industrialization of technological achievements.
- Proposed the strategic concept of "press forward with the structural adjustment, combination & restructuring, energy saving and emission reduction in the cement and glass segments, make great efforts to develop new building materials, new houses and new energy materials," accelerated the structural adjustment, transformation and upgrade.
- Stuck to the market-oriented reform, propos the reform guideline of "marketization of centrally-administered SOE".

- Proposed the work focus of "four-emphasize, four-control, four-improve, four-reduce", paid attention to increase stabilizing, internal enhancement and transformation promoting with a view to "price stabilization, cost reduction, receivables collection, inventory curtailment, adjustment", established the concept of "quality improvement, efficiency increase, transformation, upgrade".
- Made the CNBM's 13th Five-Year Plan, proposed the grand vision of "3345" for the next 5 years.
- Stably promoted the "dual-pilot" reform that develops diversified ownership and puts into practice the powers of the board of directors.
- Make plans for new strategic restructurings, explored the transformation to an investor and operator.

Outlook for the 13th Five-Year Plan

China National Building Materials Group Corporation 2015 Social Responsibility Report

Outlook for the 13th Five-Year Plan

In process of the rapid growth in the recent ten-odd years, CNBM has kept its composure under the guidance of correct strategic objectives by persistently observing the development rules of the industry and the growth logics of enterprise. During the 13th Five-Year Plan, we will continue practicing the 5 development concepts (innovation, coordination, green, opening-up, sharing), and lay emphasis on improving the development quality and benefits and promoting the structural reform to firmly transform the business mode and adjust the structure with a view to the strategic objective of "to be stronger and better", thus realize the "3345" transformation and upgrade in the next 5 years. In addition, we will make efforts to write a new chapter of sustainable development by adhering to the "3 strategies", working in line with the "3 curves" idea, promoting the "4 transformations" and realizing the "5 visions".

Evolution of CNBM's Strategic Positioning

 Made great efforts to develop new building materials, played a demonstrative and guiding role in the field of new building material, supported the development of the China's construction industry in the reform and opening-up.

An industrial company in the field of new building materia

1984-2002

consolidate the existing advantages or the main business and accelerate product transformation, technical transformation and service transformation in line with the "3 curves" idea based on the building material segment and its associated segments, continuously foster new impetuses for growth make efforts to be a strong, excellent "building material + new material" comprehensive service provider with international compatitiveness and influence.

A "building material + new material"

2016-2020

A comprehensive building material group

2002-2015

Pressed forward with the structural adjustment, combination & restructuring, energy saving and emission reduction in the cement and glass segments, made great efforts to develop new building materials, new houses and new energy materials, coordinated the developments of R & D, manufacturing and trade, grew into the China's strongest comprehensive building material group with global leading position, favorable capability of continuous innovation and international competitiveness.

CNBM's strategic framework for the 13th Five-Year Plan

4 transformations

• Transformation of CNBM from an

materials.

company.

industrial group to an investor and

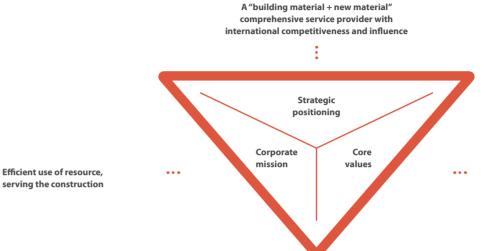

• Transformation of the subsidiaries

• Transformation of the business

• Transformation of CNBM from

a native Global 500 company to a transnational Global 500

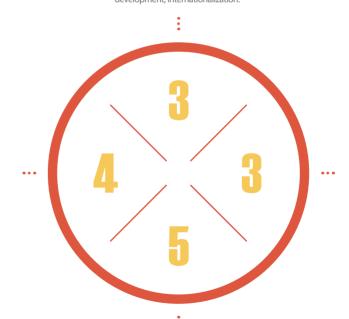

from building material to various

Innovation, performance, harmony, responsibility

3 strategies

Innovation-based driving, green development, internationalization.

5 visions

Humanity, intelligence, green, performance, globalization

3 curv

- Press forward with the supplyside structural reform in the traditional segments (cement, glass, etc.), refine the cement segment, strengthen and optimize the glass segment, promote the development of special cement and PV glass for the purpose of "integration, engineering, industrialization, internationalization".
- Make great efforts to develop the 3-new industry (new building material, new house, new energy material), build new profitmaking points in integrated and innovative modes.
- Actively explore modern service, pay attention to the grand R & D, Internet plus, inspection &

Outlook for the 13th Five-Year Plan

3 Curves

As an extension of the corporate development theory of "second curve", the "3 curves" idea refers to continuously fostering new growth points and promoting industrial upgrade and transformation in process of corporate development. During the 13th Five-Year Plan, CNBM will consolidate the existing advantages of the main business and accelerate product transformation, technical transformation and service transformation in line with the "3 curves" idea based on the building material segment and its associated segments, and continuously foster new impetuses for growth.

reduction and efficiency increase by making greater efforts in equipment upgrading and technological

transformation.

Consolidate and improve "curve 1"

We will reconstruct and improve the traditional segments (cement, glass, etc.), and thoroughly press forward with the supply-side structural reform. In addition, to actively play the leading role of large enterprise, we will make efforts to promote the structural adjustment in the cement and glass segments through market co-opetition, outdated emission reduction, production optimization and product upgrade, and work on improving market health and achieving the goals of quality improvement and efficiency increase.

- Refine the cement segment, continue promoting • Strengthen and optimize the glass segment, extend environments, solidify the core profit-marking segments; promote the development of high-performance material, special material, commercial concrete and finished product, boost energy saving, emission reduction, cost
 - upgrade the glass segment in the direction of "electronics, PV, intelligence, energy conservation", increase added

 New building material: continue optimizing and perfecting the layout of gypsum board segment, develop and promote high-end products, increase added value of

• New house: make great efforts to develop the new house system primarily made up of light steel structure and prefabricated steel structure as well as the residenceoriented component system, promote the Energy Plus 5.0 House System and build "green towns" at home and abroad, supply the all-round housing solutions of ecosmart residence and elderly care housing to customers.

Accelerate

We will make great efforts to develop the 3-new industry (new building material, new house, new energy material), and continuously improve the profitability. In order to meet the industrial demands and requirements for structural adjustment emerging in the new normal, we will expand and strengthen the emerging segments (new building material, new house, new energy material, etc.) through technical innovation and layout optimization, extend the business layout to the key links of the industry chain, and build new profit-making points in integrated and innovative

 New energy material: continue optimizing and perfecting the advantageous segments (wind turbine blade, high-performance glass fiber, electronic glass, highend refractory material, etc.), improve the manufacturing, application and marketability of high-performance carbon fiber, PV glass, CIGS thin-film solar cell and graphite, make significant breakthroughs in the fields of BIPV and PV agriculture, march into the field of new energy power plant, perfect the new energy industry chain.

Actively foster

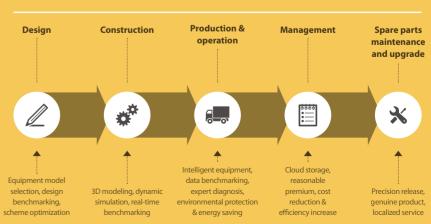

"curve 3"

of the technologies like Internet, big data and intelligence, conduct the grand R & D, Internet+, inspection & certification, carbon trading, EPC and manufacturing services, and build new growth points with new economic forms, new modes and new types of operation

- Grand R & D: give full play to research resources and researchers, further improve the consciousness, quality and effects of technological service, build an open R & D service platform and a technological achievement incubation platform.
- Internet+: devote major efforts to promoting the new foreign trade modes ("cross-board e-commerce + overseas warehouses", "intelligent industry + intelligent port", BNBM HOME, etc.) based on the "Internet+" optimized service, build a global leading comprehensive
- One stop: devote major efforts to developing the inspection & certification, carbon trading and consulting services, extend the industry chain to the field of comprehensive service (new material, new energy, energy saving and environmental protection, life science information technology, etc.), innovate on service modes to supply convenient, networked, localized one-stop service to customers.
- Integration: innovate on EPC modes, extend the overseas engineering segment to later maintenance, operation and spare parts, consolidate the advantages of high quality, technical precedence and high-profile brand, supply the services of investment management, remote monitoring, maintenance and matching parts to the customers in the integrated way.

Outlook for the 13th Five-Year Plan

4 Transformations

In the new normal, transformation and upgrade are the only road for breakthrough and a source of opportunities. During the 13th Five-Year Plan, we will further accelerate the "4 transformations" through technological innovation, business mode innovation and management innovation, based on consolidating the traditional advantages.

10 Types of New Materials

Transformation of Operation ... Mode

 CNBM will transform from an industrial group to an investor and operator. The headquarter will actively strive to convert the form of state-owned capital at fair prices in capital markets (securities trading market, property transaction market, etc.), and promote the reasonable flow of and maintain and appreciate the value of stateowned capital through equity operation and value management in an orderly way.

Transformation of Value ... Orientation

 The subsidiaries will transform to listed companies. Accordingly, the emphasis will be converted from income and profit to market value. The securitization rate of the CNBM's assets will be improved with the aim of listing 8~10 professional companies. A management mechanism oriented to market value will be established in the listed subsidiaries for the purpose of dual driving of entity operation and capital operation.

Transformation of Business ···

 The CNBM's business will transform from building material to various materials.
 On the principle of proper diversity, CNBM will develop into a comprehensive material industrial group integrating the building material and new material segments, to further strengthen the segment combination and improve the comprehensive strength and international competitiveness.

Transformation of Market ... Coverage

 CNBM will transform from a native Global 500 company to a transnational Global 500 company. By adhering to the cooperation culture of "genuine, honest, intimate, sincere", we will innovate on the Go Out modes, accelerate the implementation of the Belt and Road Initiative, emphasize the industry-financing combination, enhance broading and promote the win-win cooperation to grow into a transnational Global 500 company.

5 Visions

Any country, nation or enterprise should have a vision. As a distinguishing feature of outstanding team, common visions are a strong impetus for organization development and a reflector of the members' pursuits, integrating the personal visions of all the members. The CNBM's visions for the 13th Five-Year Plan are humanity, intelligence, green, performance and globalization.

Humanity ...

 The so-called "people oriented" refers to "enterprises being people, by the people, for the people and loving the people". The "enterprises being people" meanpers å. Øersc.

that an enterprise essentially operates for persons, including entrepreneurs, investors and social persons. The "loving the people" means that an enterprise should motivate the staff's enthusiasm and creativity, meanwhile care for the staff to grow simultaneously with the staff and create an environment with safety, warmth and happiness.

China National Building Materials Group Corporation 2015 Social Responsibility Report

Intelligence ···

 We will seize the opportunities arising from the new round of technical revolution, accelerate the industrializationinformatization fusion, make progress in fulfilling the tasks related to Internet+ and the "Made in China 2025", make intelligent key equipment and technological processes, reduce the cost and the energy consumption, and strive to occupy the commanding heights of and make breakthroughs in a few key fields. To improve the overall value of the upstream and downstream industry chains, we will strengthen structural adjustment and technical innovation, further extend the industry and value chains through synthesis of service-oriented manufacturing, production-research combination and integrated innovation, and continuously scale the high end of the industry chain.

Green

•

 By adhering to the development concept of "green, cyclic, low-carbon", we will voluntarily reduce the emission of hazardous gases (greenhouse gas, SO_2 , NOx, etc.) and other pollutants, and improve the capability of resource recycling.

Performance ···

 By adhering to the principle of "benefit first, efficiency first", we will fulfill various tasks in strict accordance with the benefit objective, thoroughly put into practice the performance culture, and digitalize all steps to continuously create high performance and rank among domestic leading and international top-ranking enterprises.

Globalization ···

 We will tightly seize the opportunities for internationalization (e.g. the Belt and Road Initiative) in the global perspective, innovate on the Go Out modes by making good use of domestic and overseas markets and resources, and build a favorable corporate image. On the basis, the capability of internationalized operation, as well as the international influence, will be continuously improved.

Rating Report

Rating Report of 2015 CNBM Social Responsibility Report

Upon the request of CNBM, Chinese Expert Committee on CSR Report Rating selected experts to form CNBM CSR Report 2015 (hereinafter referred to as the Report) Rating Team.

I. Basis of rating

Guidelines on Corporate Social Responsibility Reporting for Chinese Enterprises (CASS-CSR 3.0) and Rating Standards of Corporate Social Responsibility Reporting for Chinese Enterprises (2014).

- 1. Process Assessment Team interviewed main members of the Preparation Group of the Report, and reviewed the materials related to the preparation process;
- 2. The Rating Team evaluated the preparation process and disclosure of the Report, and drew up the Rating Report.
- 3. The Rating Report was submitted to the Vice Chairman of the Chinese Expert Committee on CSR Report Rating and the head of the Rating Team for their signatures.

III. Conclusions

Enterprise Management Department of the Group takes the lead to establish the Report Preparation Group. The Chairman of the Group acts as the head of the Report Preparation Group and is responsible for the framework of the Report and the approval for the final draft. $The \, Preparation \, Group \, identifies \, stakeholders, \, and \, collects \, their \, suggestions \, by \, question naire$ survey and emails. Substantial topics are defined according to the company's development strategy, related state policies, industrial benchmarking analyses, results of survey on stakeholders, etc. It is planned to release the Report on the "2016 Press Conference of Chinese Industrial Corporate Social Responsibility Report", and the Report will be presented in printed edition, electronic edition and Chinese-English version, etc, which reflects a leading process.

The Report gives detailed and sufficient disclosures on the substantive issues of non-metallic mineral products industry like "Product Quality Management". "Technological Innovation". $\hbox{``Occupational Health Management'', ``Ensuring Production Safety'', ``Research \& Development''}$ of Environment-friendly Products". "Conservation of Water Resources". "Reduction of Waste Emission", "Governance of Environment around Factories", with good materiality.

The Report discloses the key indicators of "Responsibility Management", "Market Performance", "Technological Innovation", "Energy Saving and Environmental Protection", "Employee Care" and "Corporate Citizen", covering 92.0% of core indicators of non-metallic mineral products industry, and can be regarded as fairly complete.

Balance (

The Report discloses negative data and information on "the employee turnover rate", "the recordable injury rate per 1,000 employees", the number of accidents in production" new cases of occupational diseases", etc., and expounds the corrective measures against accidents in production of member companies in details, which shows a good balance.

IV. Recommendations for improvement

Provide further disclosure of negative events to further improve the balance of the Report.

Rating team

Team leader: Zhong Hongwu, Director of the Research Center for Corporate Social Responsibility of Economics Division of Chinese Academy of Social Sciences

Feedback

Thank you very much for caring and supporting the social responsibility work of CNBM. Please fill in the questionnaire below, and send it back to us through fax or mail. If the blank space is insufficient for your response, please attach an additional page; if you want to reply by electronic means, please log onto our website at www.cnbm.com.cn, click on "Social Responsibility" and then click on "Social Responsibility Communications - Feedback". You can also scan the two-dimension code on the right to fill in your feedback via mobile terminal. We will make continuous improvements in our work in the future according to your suggestions and advice.
